
Aktos

Backend Take-Home
Coding Challenge

What you can expect working here

- Transparency and radical openness.
- Have real ownership in the things you do. At this stage, we're building pillars of the product that will exist for years to come.
- Have real opportunities for growth. We will always look internally for advancement opportunities within the company before looking externally.
- Be treated as an adult. We don't track vacation days, we don't track sick days, and we won't fill your calendar up with endless meetings. Be communicative and be great at what you do and we'll never sweat the small stuff.

**We're Building the
company we always
wanted to work for**

Overview

You will have **one week** from receiving this challenge.

Please spend no more than a day on the problem. We give you a week to make sure you can fit our challenge into your schedule, but the challenge itself should take no more than a day.

Use this structure in your project:

- The assignment is attached in the email.
- Use Github and share the repository with **itsdpao**; commit as you would normally would
- **You must use Python/Django** to accomplish this assignment.
- When you're done, please deploy your solution somewhere like Heroku.
- Please include a brief write-up in a README on what else you'd want to improve or add if you were going to spend more time on it.

Good luck!

If you have any questions regarding the assignment, please feel free to reach out to us at daniel@getaktos.com
